

SUN SHADE

Instructions

Installation:

- Step 1:** Attach "Head Rest Clips" to top edge of seat back on the outside of handle tubes.
- Step 2:** Push the back edge of seat cover forward exposing plastic shell. Then, locate the 3rd hole down from the top (see illustration below).
- Step 3:** While keeping seat cover fabric pushed forward, press "push pin" (sewn into bottom portion of Sun Shade) into the #3 hole until it "clicks" into place. (Repeat procedure for opposite side.)
- Step 4:** Install "Tension Cords" as shown.

Removing the Sun Shade:

- Step 1:** Using finger tips, reach behind seat shell and press "push pins" outward until they "pop" free from seat shell hole.

Note: Do not pull on bottom of Sun Shade to remove "push pins"; this may tear your Sun Shade.

- Step 2:** Carefully remove remaining head rest and tension cord clips.

Note: Clips are designed to be flexible and can be spread open slightly for easy installation and removal.
